

NAVSUP 2022 Commander's Guidance

NAVAL SUPPLY SYSTEMS COMMAND

Ready. Resourceful. Responsive.

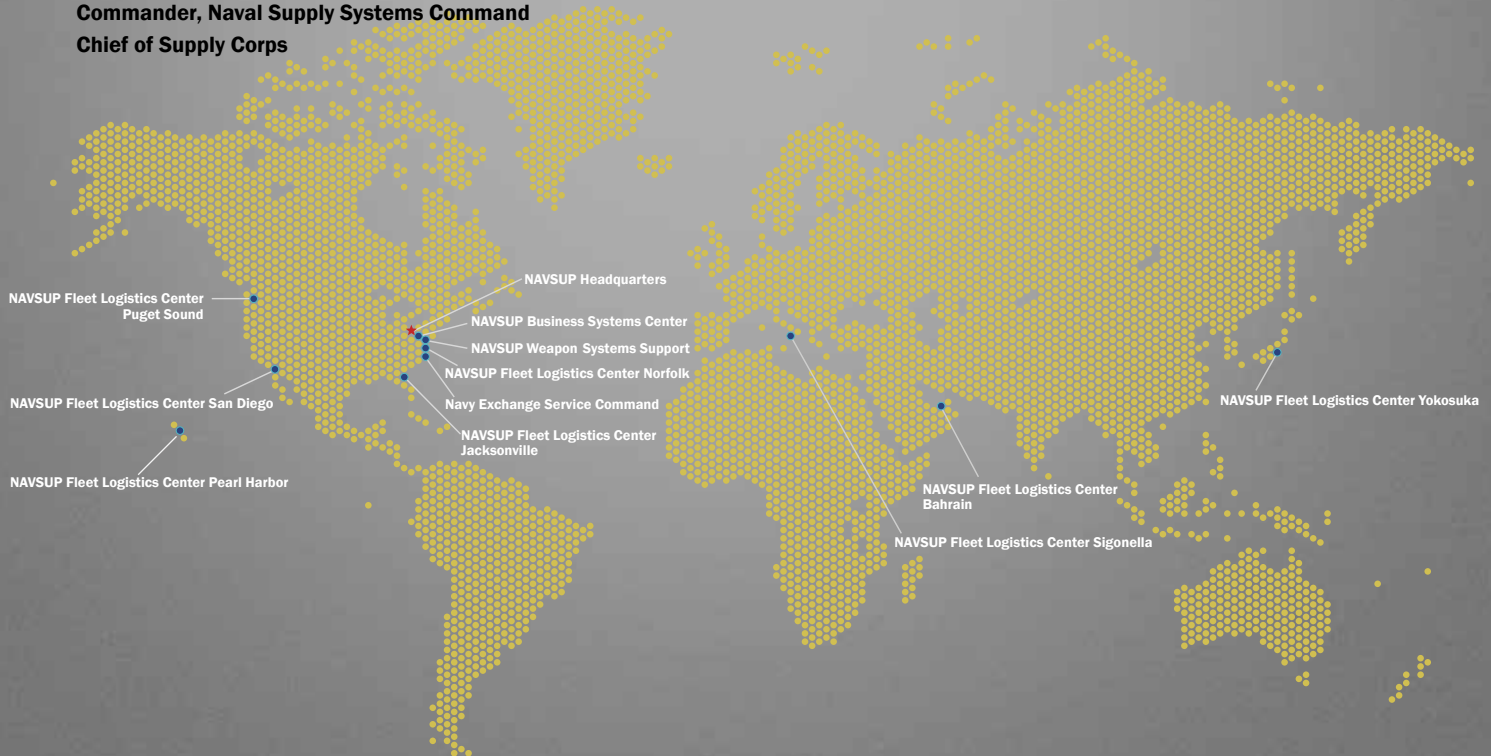

RADM Peter G. Stamatopoulos, SC, USN
Commander, Naval Supply Systems Command
Chief of Supply Corps

OUR MISSION

NAVSUP and the Supply Corps conduct and enable supply chain, acquisition, operational logistics and Sailor & family care activities with our mission partners to generate readiness and sustain naval forces worldwide to prevent and decisively win wars.

NAVSUP 2022 COMMANDER'S GUIDANCE

OUR MISSION FOCUS

Producing high-impact and measurable mission results; aggressive, action oriented and courageous; and focusing on Fleet operations. We bring to bear supply chain, acquisition, sustainment and logistics capabilities to protect and achieve mission. Every day our commitment is toward results and outcomes, vice efforts and activities, in Fleet and Joint operations.

Naval Sustainment System-Supply will drive end-to-end naval supply chain integration and reform as it streamlines the Navy's supply chains to increase readiness, decrease turn-around-times, increase velocity of spares, and reduce costs.

All commanders shall ensure alignment with the Chief of Naval Operations' Charge of Command, which calls on military and civilian, at sea and ashore, to apply Get Real Get Better principles for self-assessing, self-correcting, and using a learning mindset.

OUR INTEGRITY

Accountable for right and wrong, success and failure; honest, trusted and selfless; fiduciary responsibility for personnel, material and fiscal resources.

Integrity as a value for Naval Supply Systems Command and the Supply Corps is uncompromising. Honest and trusted teams are a must for mission accomplishment. Those who lack integrity are not valued, even if they achieve mission success.

NAVSUP 2022 COMMANDER'S GUIDANCE

OUR AGILITY

Always learning, adapting, and teaching to advance the mission; innovative, versatile and adaptable; forward thinking and anticipating change in the operating environment.

We develop Supply Corps officers and Naval Supply Systems Command employees with a progressive mix of field and headquarters staff experience, providing the necessary repetitions in the art and science of supporting logistics and sustainment missions. This experience exposes our workforce to Fleet and enduring complex problems, resulting in success and failures that improve their knowledge and abilities to handle the routine and unexpected. Never complacent, we do not embrace the status quo, but rather invite contrary views to advance our mission.

OUR EXCELLENCE

Unrivaled supply chain, acquisition, logistics and operational expertise to achieve mission success; continuous improvement through data analytics, self-assessment, critical thinking, and candid professional engagement with seniors, peers, subordinates, mission partners and suppliers.

Supply Corps officers and Naval Supply Systems Command employees strive relentlessly for excellence. We foster a competitive environment to achieve mission success. We are all about winning, getting to great and delivering high-impact results to our Navy, Joint and Allied partners.

FROM THE CNO

The Charge of Command 2022

« GET REAL, GET BETTER »

“History shows the navy which adapts, learns, and improves the fastest gains an enduring warfighting advantage. The essential element is fostering an ecosystem—a culture—that assesses, corrects, and innovates better than the opposition.”

*—Adm. Mike Gilday,
Chief of Naval Operations*

VIEW OF E2E SUPPLY CHAINS

Navy Supply Corps

COMPREHENSIVE NAVYWIDE

Acquisition & Lifecycle Sustainment	Supply Chain Management
<p><i>Acquisition & Lifecycle Sustainment is the management & procurement process to acquire technologies, weapons systems, programs, lifecycle product support & logistics necessary to maintain & prolong a weapon systems operational availability (Ao)</i></p>	<p><i>Supply Chain Management is a cross-functional approach to integrate procurement, suppliers, manufacturers, warehouses & end-users to deliver products & services for military material applications to satisfy service readiness requirements</i></p>

Lines of Operation

VIEW OF E2E SUPPLY CHAINS

Operational Logistics

Operational Logistics addresses sustainment w/in the military theater of operation. It connects the supply chain & logistics effort of the strategic level w/ those of the tactical level necessary to maintain & prolong operations until mission accomplishment

Afloat & Expeditionary “Ready for Sea”

Procuring materials, storing materials, & expending materials necessary to maintain & prolong operations until mission accomplishment

NSS-SUPPLY FOCUSES ON 6 KEY PILLARS TO DRIVE HIGHER PERFORMANCE

GOVERNANCE

NSS-SUPPLY and E2E Integration

Govern, coordinate, and synchronize strategic supply chain decisions by leadership across Navy.

PILLARS

Achieve E2E Integration

Integrate existing Supply Chain resources (i.e., neural network) to sustain the force.

Demand Management

Reduce demand and increase predictability through design, engineering, maintenance, etc.

Optimize WCF Portfolio

Take a portfolio approach to managing cash allocation to maximize readiness.

Shape Industrial Base

Expand competition with suppliers and deepen partnership with strategic suppliers.

Optimize Organic Repair

Increase organic depot repair volume to fully utilize capacity.

Increase E2E Velocity

Shorten E2E repair TATs in line with commercial, and move parts in the system faster.

ENABLERS

Executive Reliability Control Board (E-RCB), Sustainment Program Baseline (SPB), Maintenance Operations Center (MOC) Aircraft-on-Ground (AOG), NAVSUP WSS Logistics Cell Operations Model (WSS LOGCELL OpModel), NAVSUP BSC, NAVSUP FLCs, supply community, tools for E2E visibility such as: Integrated Supply Chain Management (ISCM), machine learning (ML), Enterprise Resource Planning (ERP), Naval Operational Business Logistics Enterprise (NOBLE).

Acronyms

PAGE 3

CNO – Chief of Naval Operations

PAGE 4/5

E2E – End-to-end

OPLOG – Operational Logistics

METLs – Mission Essential Task Lists

HHG – Household Goods

POL – Petroleum, Oil and Lubricants

FM – Financial Management

AC – Acquisition

ILS – Integrated Logistics Support

RTAT – Repair Turnaround Time

E&C – Existence & Completeness

OM&S – Operating Materials and Supplies

GLS – Global Logistics Support

DFSP – Defense Fuel Support Point

LSR – Logistics Support Representative

SPV – Subsistence Prime Vendor

FLSS – Forward Logistics Support Site

HSP – Husbanding Service Provider

LOG IT – Logistics IT

AI – Artificial Intelligence

ML – Machine Learning

DMO – Distributed Maritime Operations

GFM – Global Force Management

DFE – Dynamic Force Employment

WCF – Working Capital Fund

Scalable IAW OPLANS – In accordance with Operational Plans

F (g) – Force Generation

F (e) – Force Employment
